Leiden University, the Netherlands

**MUUSUM**  
**VOOR VOLKSKUNDE**

**Universiteit  
Leiden**  
The Netherlands

## Program ARPH 2017 sessions Thursday February 2<sup>nd</sup> 2017, 11:15 – 12:45

### 1.1 Thematic session: Quality of life (Grote zaal)

Nijboer	Measuring subjective quality of life in people with locked-in syndrome: a comparison of two instruments.
Meuleman	Health-related quality of life trajectories during predialysis care and associations with illness perceptions.
Willemse	Applying the Common Sense Model in predicting quality of life in Alopecia Areata.
De Vries	Comprehensively measuring subjective well-being: dimensionality analysis for improved outcome assessment.
Custers	Quality of life, fatigue and mental health in patients with the m.3243A > G mutation.

---

### 1.2 Symposium: The psychology of eating-related behavior (Paviljoenzaal)

Zamariola	Predictors of attentional bias for (un)healthy food: the role of external eating and nutrition involvement.
Mulders	How do people respond to nutrition claims on vegetables? A quantitative and qualitative analysis.
Almudena Claassen	Future me wants me to be healthy: thinking about the future reduces snack food intake.
Chang	Being mindful can reduce willingness to eat both healthy and unhealthy food.
Alblas	Food commercial exposure influencing goal activation in (un)restrained eaters high and low in self-regulatory success.

---

### 1.3 Thematic session: Implicit processes in health psychology (Nooterzaal)

Schakel	Optimizing health behavior intentions with serious games: an experimental study.
Van der Laan	Motivational salience and higher order goals influence reflexive saccades towards food: an eye-tracking study.
Muschalik	The role of implicit attitudes in intention and physical activity behavior: a longitudinal study.
Wiers	Cognitive Bias Modification and addiction, What have we learned?
Adriaanse	Explaining unexplainable food choices.

---

### 1.4 Symposium: Personalized Health inspired by technology (Gerbrandszaal)

Bode	Blended interventions for personalized health: is this the way patients and professionals like to go?
Engelbertink	Autobiographic writing for social work students supported by persuasive technology.
Crutzen	So close, no matter how far? Perceived distance and attitudinal shift in an online context.
Sieverink	Log data analyses to personalize eHealth technology: predictors for adherence.
Schotanus Dijkstra	Cost-effectiveness of an early intervention to promote flourishing and prevent anxiety and depression.

## Program ARPH 2017 sessions Thursday February 2<sup>nd</sup> 2017, 14:00 – 15:30

### 2.1 Thematic session: Transplantation and donation (Nooterzaal)

Klinkenberg	Barriers and motivations for donating blood in an ethnically diverse group in Chicago.
Bosch	Inflammation and circulating LPS are independent predictors of depressive symptoms and fatigue in stable kidney transplant recipients.
Wirken	Healthcare professionals' judgment or donor's self-report? Prediction of impaired longer-term HRQoL of living kidney donors.
Van Lint	The safety and usability of self-monitoring creatinine after kidney transplantation: results of a clinical trial.
Huisintveld	How cognitive personality factors predict the perceived barriers and capability to donate blood or plasma.

---

### 2.2 Symposium: Placebo and nocebo effects on health (Gerbrandszaal)

Porsius	Profiling nocebo responses to high-voltage power lines.
Meeuwis	Effects of open-label verbal suggestions on itch .
Jacobs	Preventing adverse information effects: self-affirmation improved cognitive performance and diminished problem reporting for cancer patients.
Peerdeman	Expectations regarding medication: the importance of how medication is administered and which symptom is targeted.

---

### 2.3 Thematic session: Psychological factors in oncology (Paviljoenzaal)

Wu	How do the media communicate cancer with us: a content analysis in UK Newspaper and Facebook.
Van Ee	Older women dealing with breast cancer: a challenge or part of the game?
Köhle	Web-based self-help intervention for partners of cancer patients based on Acceptance and Commitment Therapy: effect-study.
Ter Kuile	Cervical cancer survivors' sexual distress, associated factors and sexual pain worry: a cross-sectional multicenter study.
Bronner	Exploring anxiety at the point of cancer diagnosis.

---

### 2.4 Symposium: Psychological consequences after physical trauma (Grote zaal)

Mouthaan	Risk screening for PTSD after injury using early symptom checklists.
Karabatzakis	Prevalence and course of psychosocial problems following physical trauma: a systematic review.
E. Visser	Course and treatment of acute and post-traumatic stress and a patients' perspective after physical trauma.
Hafkamp	The influence of expectations on satisfaction in patients with physical trauma.
A. Visser	Treatment of posttraumatic stress disorder (PTSD) in prostate cancer patients.
